## Mission;

To meet the customer demand and expectations at the highest level by continuously improving the product and service quality

To be among the innovative, internationally accepted brands that create value for human health

To make customer satisfaction, belonging and loyalty sustainable

To produce the “first” and the “best” ones in the field of disposable medical textile products by developing new products

To provide product support to its customers during sales and after-sales process

## Vision;

Our vision is to make  a world brand by offering the same quality service to all its customers without compromising its health and hygiene policy,

by regards human resource as the most valuable asset,

by constantly improving their methods in the field of expertise in order to improve productivity,

by creating its own brand,

by increasing its service quality in its field as a reliable and reputable company, and

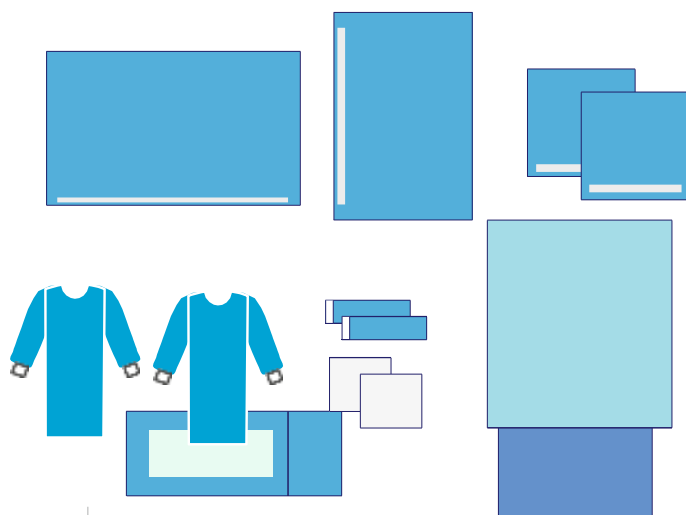

by presenting hygienic products to the users.

## Birth of Our Brand

Our company, which has started out with the aim of creating a world brand, has created  brand by inspiring from the names of two main sectors in which it is active as a result of the permanent identification studies in this long run.

With a simple name preference, our company wishes to emphasize with a simple expression that it would be a long-running actor and has a full command of the essence of work in the Disposable Surgical Products field.

At this point, we see that  brand has a voice and also has become a determinant brand.

The followings are produced together with

Disposable Drape Sets (Sterile & Non-Sterile) specific to all surgical operations,

Disposable Apron Types (Sterile & Non-Sterile) specific to all surgical operation team,

Disposable Lab Coats,

Disposable Clothes and Gowns,

Disposable Work-clothing,

Disposable Medical Device Cases, and

Human Remains Pouches

## Why disposable;

The general objective of the drapes used in the surgical operations is to serve as a barrier against bacteria being a factor in the development of surgical site infections. In this way; the sterile site can maintain its sustainability because the material used is disposable and also minimize the infection risk. Its feature being specific to the operations and person increases extraordinarily the sustainability of the sterile site.

## A Quality Drape;

It should be in accordance with the operating room environment and operation dynamics.

It should maintain the pre-set body temperature.

It should have an acceptable resistance to mechanical electrification and ignition.

It should be resistant to wear, tear, and the most importantly to puncture.

It should be resistant to bacterial permeability.

It should be sterilized and also should sustain this status.

It should be antitoxic.

It should be anti-pilling and also should not release dust.

It should be of fine-porous and ticking in terms of weaving structure.

Medicotex
